Cinova company profile

Our story, our team and the way we work

ABOUT US

Built in Central Queensland

 Example document

This is an example to show the format. It is not a live document and not a client record.

Cinova started in Gladstone building software for the industrial and infrastructure companies around it. The work there runs on paper, spreadsheets and phone calls, and most off the shelf systems were made for somewhere else.

We build the system a company needs around the way its people already work, then keep it running.

Lachlan Blake

Founder and Director. Owns the outcome and signs the work off.

Lloyd Croaker

Managing Partner. Owns delivery, day to day.

HOW WE WORK

Four promises we keep

PROMISE	WHAT IT MEANS FOR YOU
One point of contact	You always know who to call, and they answer
Fixed scope, fixed price	What is in and what is out is written down first
You watch it being built	Every milestone is something you can open
You own the result	Code, files and data are yours once paid

Getting started

Every project starts with a short discovery call. We listen first, then write down what we heard.
